Home-Stay

Email: From Field Coordinator to Administrator

Hi Susan,

Jamie came to me yesterday to say that she is upset. Apparently, on the next to last day of her home-stay that she and the family had gone out grocery shopping. It was raining and as everyone ran inside with a bag, the father detained her by putting his hand on her thigh. He was saying something to her that she thought was suggestive but she didn't understand the words. Someone came back out and she was able to extricate herself. There were no additional incidents.

Not sure what to do here. This family has been our biggest booster and is the reason many of the other families participate. Jamie says that she has had difficulty sleeping since the incident.

Any suggestions on how to proceed?

- (1) Basically its main issues deal with ~~the~~ overexploitation of the dependant nation. The ~~main~~ function is to gain economically based on use of products that ~~the~~ completely control ~~the~~ economic prosperity for the nation that is exporting goods. Unfortunately if the exporting nation does not comply the import nation can ~~the~~ overtake the export nation economically + with military force
- (2) Free trade is detrimental in the sense that it
- (3) Despite my inability to retain any sort of information, I find myself stammered by stupidity. I ~~am~~ am sorry for this disrespect. Though you have opened up the door for me, I ~~am~~ have been closing it. I am at the point of no return, I ~~am~~ have given up. Why study when you know you are going to fail. It is a constant battle. And look how fortunate I am to ~~have~~ have this opportunity; I am throwing it away. There is always a way to get out of a jam like this, if I look at these words and ~~am~~ I am ~~am~~ confused and intimidated. If you cannot communicate, then you are useless in this world. It is an endless soup in the begin. Please fail me. I'm not good with words, numbers. I should have it figured out already. There is no common sense, which I find brilliant by the way. Globalization ~~can~~ can be detrimental because it detaches a sense of community. This is caused by universalization of occupations. This is due for the demand for cash crops, which severely undermines the way of life. Sustainable farmers are now forced to grow such items like coffee which is ~~useless~~ useless for survival. The cost of trade is greatly increased ~~and~~ and not ~~paid~~ paid in the final product. These are only a few statements that Duty provides. I listen to ~~Edward Grieg's~~ Edward Grieg's Piano Concerto, it is what is going through my head. The timbre the brass ~~instruments~~ instruments is quite beautiful.

Death of U.S. Citizens Abroad by Non-Natural Causes

Print Email

Sec. 204(c) of P.L. 107-228, the Foreign Relations Authorization Act for Fiscal Year 2003, mandates that, to the maximum extent practicable, the Department of State collect and make available on the Department's Bureau of Consular Affairs Internet web site certain information with respect to each United States citizen who dies in a foreign country from a non-natural cause. The information required is: (1) the date of death; (2) the locality where the death occurred; and (3) the cause of death, including, if the death resulted from an act of terrorism, a statement disclosing that fact. Whenever possible, a more specific cause of death is provided (e.g., Drowning-Ocean, instead of Drowning. The information on the web site must be listed on a country-by-country basis, and must cover deaths occurring since the date of enactment of the legislation on September 30, 2002, or occurring during the preceding three calendar years, whichever period is shorter. The information is updated

SU student dies in France

Matt Wanetik reportedly fell while studying this semester in Strasbourg.

Saturday, October 04, 2008
By Douglass Dowty
Staff writer

A Syracuse University student studying abroad in Strasbourg, France.

Matt Wanetik, a junior political science and international studies major, had been studying through the SU Abroad Strasbourg program.

Wanetik was a member of the Alpha Epsilon Pi fraternity. He was killed in a "slip-and-fall" accident.

Student dies while studying abroad in India

Katherine "Katie" Sherman, a junior from Chelmsford, died last week while studying abroad in Auroville, India.

Dean of students Jo-Anne T. Vanin reported Sherman's death in a March 25 e-mail message to the campus community.

The e-mail said Sherman was a Bachelor of Fine Arts major with a concentration in photography. She also worked at the Student Union Craft Center.

According to Vanin, Sherman was studying sustainable living, ecology and group dynamics while in India.

"We extend our deepest sympathy to her family and friends during this difficult time," said Vanin.

March 26, 2008.

Dickinson College student dies in Guatemala

by The Patriot-News
Monday January 12, 2009, 5:31 PM

A Dickinson College sophomore drowned Saturday while on a Serve the World trip to Guatemala with 17 other students and staff of the Carlisle school, college officials reported.

Nathaniel Kirkland, no age available, of Philadelphia, was discovered missing when the rest of his group finished swimming at a beach that was protected by lifeguards, college President William Durden said in a message posted on the school's Web site. His death was confirmed by local authorities Sunday.

Durden said the other students on the trip, sponsored by the United Methodist Church, will return to the U.S. as soon as possible.

Plans are being made for a memorial service on campus, he said.
